

## PRODUCT SPECIFICATION

### Product: Carry Bag Paper

A sustainable and environmentally friendly bag material that is made from recycled materials and is resistant to tearing, moisture, stress, and punching.

| Standard Parameter       |               |      |
|--------------------------|---------------|------|
| Tear                     | MD            | 92   |
|                          | CD            | 110  |
| Cobb (g/m <sup>2</sup> ) | Top           | 40   |
|                          | Bottom        | 42   |
| GSM ( ± 3 )              | 100           |      |
| BF (Kg/cm <sup>2</sup> ) | 28.0          |      |
| RCT (knm)                | MD            | 0.62 |
|                          | CD            | 0.48 |
| Thickness (cc/gram)      | 1.50          |      |
| B.L.M (nm/g)             | MD            | 7000 |
|                          | CD            | 4000 |
| Moisture (%)             | 7.00% - 7.50% |      |

\*The above specifications are as per the standard test conditions of 27 +/-2 degree c temperature and 65 +/- 2% relative humidity as per : 1060

\*\*tolerance in GSM and RCT is +/- 5%
